Faiz Fajar

Software Engineer | Machine Learning Enthusiast | Developing AI
Solutions with Python, TensorFlow, and Next.js

Surakarta, Central Java, Indonesia

Summary

I am a Software Engineering and Machine Learning enthusiast who is passionate about building technology solutions that create real-world impact. Currently, I am exploring software development, artificial intelligence, machine learning, and recommendation systems while continuously improving my skills in Python, JavaScript, Next.js, TensorFlow, and modern web technologies. I am also working on AI-driven projects, including career recommendation systems and intelligent web applications that help users make better decisions through data and machine learning. My interests span across software engineering, machine learning engineering, data science, and AI-powered product development. In addition to technical development, I have experience as a Coding Teacher at Akademia by Ruangguru, where I help students understand programming concepts and develop problem-solving skills through coding. I enjoy learning new technologies, building meaningful projects, and collaborating with others to transform ideas into practical solutions. Areas of Interest: • Machine Learning & Deep Learning • Artificial Intelligence • Software Engineering • Full-Stack Web Development • Recommendation Systems • Data Science Let's connect and discuss technology, AI, software development, and innovative digital solutions.

Experience

Akademia by Ruangguru

Coding Teacher

August 2025 - Present (11 months)

Surakarta, Central Java, Indonesia

Served as a Coding Instructor for the UOB x Ruangguru program, delivering structured lessons in programming fundamentals and problem-solving.

Pekerja Lepas

Freelance Developer

February 2023 - Present (3 years 5 months)

Surakarta, Central Java, Indonesia

I offer professional website and mobile app development services tailored to your business needs.

Coding Camp powered by DBS Foundation

Machine Learning Engineer Cohort

February 2025 - July 2025 (6 months)

Indonesia

Completed the Coding Camp powered by DBS Foundation x Dicoding, an intensive, project-based tech training program focused on machine learning, programming, and real-world problem solving. Graduated with distinction (top 10%), recognized for outstanding performance across all modules.

Himpunan Mahasiswa Teknik Informatika UDINUS

Web Development

January 2025 - February 2025 (2 months)

Semarang, Central Java, Indonesia

Participated in a national-level Web Development Competition organized by Universitas Dian Nuswantoro. The competition challenged participants to design and build innovative and practical web-based solutions to address real-world problems.

Education

Politeknik Nest

Diploma 3, Information Technology · (August 2022 - August 2025)
